

Repository Analysis Report

for [pytsbe](#)

- Repository Name: [pytsbe](#)
- Owner: [ITMO-NSS-team](#)
- Created at: 21.04.2022 09:41

Statistics	Values
Stars Count	36
Forks Count	3
Issues Count	11

Metric	Values
README Presence	✓
License Presence	✓
Documentation Presence	✓
Examples Presence	✓
Requirements Presence	✓
Tests Presence	✓
Description Presence	✓

Repository Structure:

- Compliance: The repository structure appears well-organized, with clear separation of concerns (data, docs, examples, experiments, pytsbe package, tests).
- Organization: Good. The project is logically structured into directories for data, documentation, examples, experiments and the core library code.

README Analysis:

- Quality: High quality. The README provides a comprehensive overview of the project's goals, features, datasets, and contribution guidelines.
- Project description: Yes
- Installation: Yes
- Usage examples: Partial
- Contribution guidelines: Yes
- License specified: Yes
- Badges present: No

Documentation:

- Tests present: Yes
- Documentation quality: Good. The documentation directory contains a README and contributing guide, providing useful information for developers.
- Outdated content: No

Key Shortcomings:

- The benchmark results sections in the README are marked as 'In progress', indicating incomplete work.
- Lack of badges (e.g., build status, code coverage) to provide quick insights into project health.
- While datasets are described, information on data preprocessing steps or potential issues isn't detailed.

Recommendations:

- Prioritize completing the benchmark results and updating the README with findings.
- Add badges for build status, code coverage, and potentially license to improve project visibility and trust.
- Expand documentation on data preprocessing steps, potential issues within datasets, and expected input formats.
